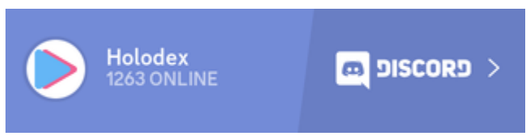
Holodex/HoloAPI V2 (2.0)

Download OpenAPI specification: Download

Holodex Public API. Successor to the HoloAPI v1

Please consider joining our Discord Server for service downtime announcements



Holodex API Documentation

This is API Documentation for Public Accessible API powering holodex.net

Get Started W/ Holodex API

> To properly secure your API Access (and prevent being blocked by our service), please log into Holodex and acquire a API KEY via the Account Settings page. In order to reliably access the API and prevent rate lockouts or CORS issues, please set the API KEY in every single request using the header `X-APIKEY`

With Holodex, you can:

- Get quick updates on who is live and who is scheduled to be live, for Youtube vtubers in the Holodex platform.
- Access and navigate the clips, channels, streams, and relationships tracked by Holodex backend crawler.
- Access Holodex's stream and clip references to see which subbers clipped a particular stream.

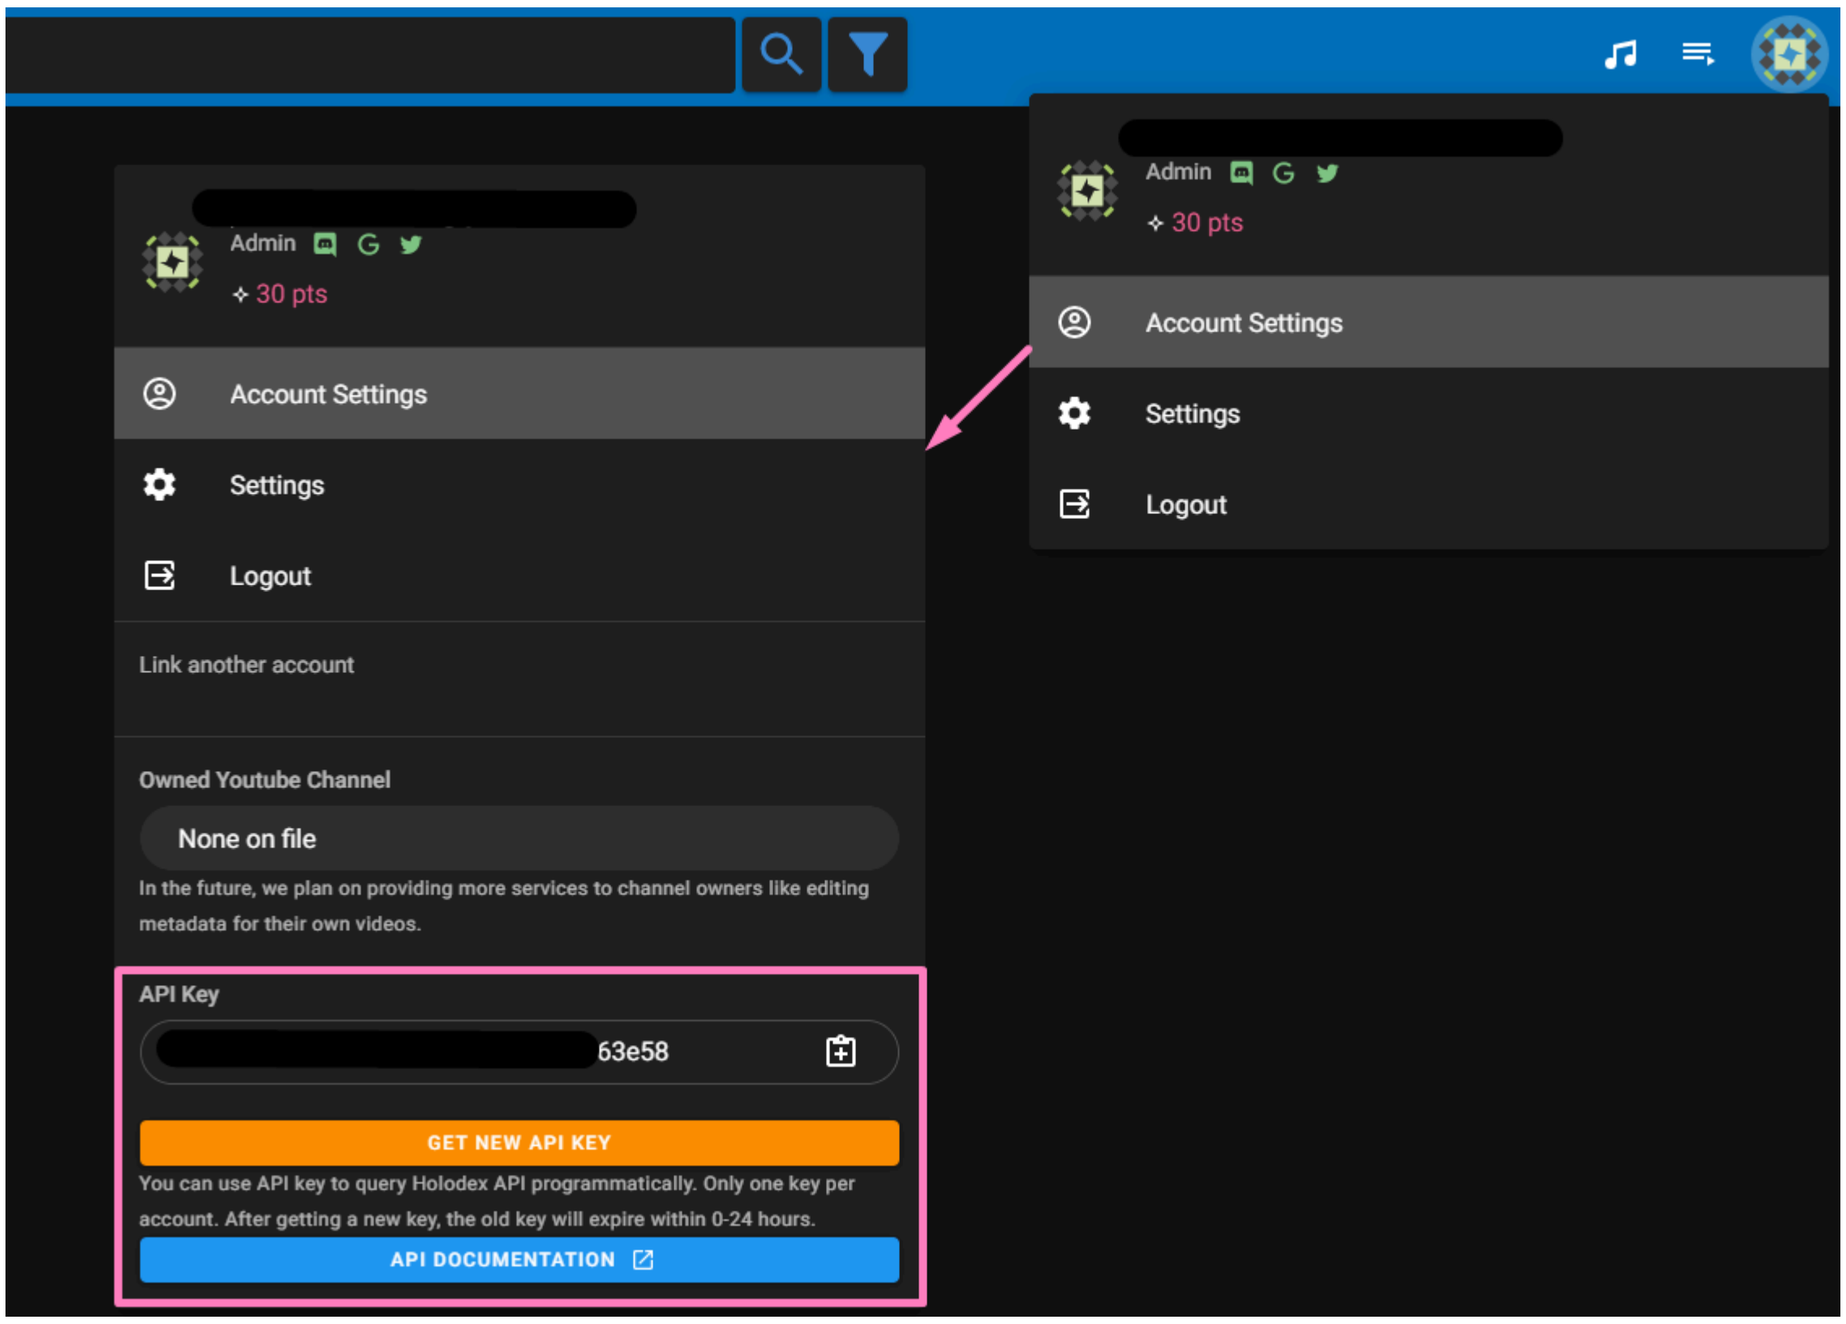
License

Getting Started

Obtaining API Key

Access the API key menu from top right account icon -> `Account Settings`.

Use the API Key by adding it as a header to your requests using the Header `X-APIKEY`



ApiKeyAuth

the X-APIKEY header is required to authenticate your request against holodex

Security Scheme Type: API Key

Header parameter name: `X-APIKEY`

Consuming the API

- Use a normal HTTP client like `fetch` or `axios`
- Community libraries
- C# - Holodex.NET By All Toasters Toast Toast
- JS/TS - holodex.js By Shiaupiau
- JS/TS - holodex-api By HoloRes
- Dart - dart_holodex_api by getBoolean
- Elixir - ex-holodex By DaniruKun
- Python - holodex by ombe1229
- Swift - HolodexKit by MarcoDotIO
- Rust - holodex-rs by anden3

LICENSE

1. Introduction;

Thank you for using the Holodex API ("we", "our" or "Holodex") application programming interface(s) ("Holodex API"). By using the Holodex API you are agreeing to the terms and conditions contained below ("Terms"). Your license to use the Holodex API is conditioned upon your agreement and conformant with the Terms. We reserve the right to update and otherwise amend the Terms from time to time without notice.

License grant. Holodex hereby grants you a revocable, non-sublicenseable, terminable, limited license to use the Holodex API solely in accordance with the Terms. Your license is automatically revoked if (i) you violate any of the Terms, (ii) we send a written notice of termination to you, or (iii) we disable your use of the Holodex API.

2. Restrictions

Adverse and Excessive Use. You may not use the Holodex API in a manner that adversely impacts Holodex's systems, including but not limited to Holodex servers or other applications. Further we reserve the right to suspend, terminate or throttle your use of the Holodex API in the event your use is deemed excessive by Holodex.

Keys. You may not use multiple application API keys for the same use case or application.

Monitoring. You may not use or access the Holodex API for purposes or monitoring the availability, performance or functionality of any of Holodex's services or for any other benchmarking or competitive purposes.

Third Party Access. You may provide access to the API to third party developers (e.g. agencies or approved partners). You are responsible for ensuring that any third party to whom you provide access abides by the Terms. Holodex will have exclusive discretion to determine whether a particular use of an API key by a third party is acceptable. You are not permitted to share API keys to bypass Holodex restrictions. You are responsible for ensuring that any third party to whom you provide access abides by the Terms. Further, Holodex reserves the right to reject third party access to the API.

Charging for Access. You may not charge a premium for access to the Holodex API or any content derived from Holodex API

Laws; Regulations; Privacy Policy. Do not use the Holodex API in any manner or for any purpose that violates any law, regulation, code or any rights of any person or entity, including but not limited to intellectual privacy rights, rights of privacy, or rights of personality. Further, you must maintain a privacy policy that accurately reflects your use of the content accessed through the Holodex API.

3. Support

Holodex may elect to provide you with support for the Holodex API (collectively, "Support"), in its sole discretion, and may terminate such Support at any time without notice to you. Holodex may change, suspend, or discontinue any aspect of the Holodex API at any time, including the availability of any Holodex API. Holodex may also impose limits on certain features and services or restrict your access to parts or all of the Holodex API without notice or liability.

4. Disclaimer of Warranty

The Holodex API is provided "as is" and Holodex disclaims all warranties, conditions, or representations (express, implied, oral or written) with respect to the Holodex API and any support related thereto, including all warranties of merchantability, fitness for a particular purpose, non-infringement, non-interference, accuracy of data, and warranties arising from a course of dealing.

5. Release and Waiver

To the maximum extent permitted by applicable law, you hereby release and waive all claims against Holodex, and its partners from any and all liability for claims, damages (actual and/or consequential), costs and expenses (including litigation costs and attorneys' fees) of every kind and nature, arising from or in any way related to your use of the Holodex API. If you are a California resident, you waive your rights under California Civil Code 1542, which states, "A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the release, which if known by him must have materially affected his settlement with the debtor." You understand that any fact relating to any matter covered by this release may be found to be other than now believed to be true and you accept and assume the risk of such possible differences in fact. In addition, you expressly waive and relinquish any and all rights and benefits which you may have under any other state or federal statute or common law principle of similar effect, to the fullest extent permitted by law.

6. Attribution

If You provide public access to the Holodex API and its material (including in modified form), You should provide:

1. Identification of Holodex, or provide a URI or hyperlink to Holodex wherever possible, plus optionally whenever applicable any others designated to receive attribution, in any reasonable manner requested by the Licensor (including pseudonym if designated);
2. provide somewhere in the source code, a notice that refers to this Public License;
3. provide somewhere in the source code, a notice that refers to the disclaimer of warranties;ink to Holodex wherever possible

Query Live and Upcoming Videos

This is somewhat similar to calling `/videos`.

However, this endpoint imposes these default values on the query parameters: You can choose to override them by providing your own values.

```
status: [STATUSES.LIVE, STATUSES.UPCOMING].join(','),
type: 'stream',
sort: 'available_at',
order: 'asc',
max_upcoming_hours: 48,
limit: 9999,
include: live_info + query's include
```

AUTHORIZATIONS: > *ApiKeyAuth*

QUERY PARAMETERS

- `channel_id`
  string
  Example: `channel_id=UCl_gCybOJRIgOXw6Qb4qJzQ`
  Filter by video uploader channel id

- `status`
  string
  Enum: `"new"` `"upcoming"` `"live"` `"past"` `"missing"`
  Example: `status=past`
  Filter by video status

- `lang`
  string
  Default: `"all"`
  Example: `lang=en,ja`
  A comma separated list of language codes to filter channels/clips, official streams do not follow this parameter

- `type`
  string
  Enum: `"stream"` `"clip"`
  Filter by type of video

- `topic`
  string
  Example: `topic=singing`
  Filter by video topic id

- `include`
  Array of strings
  Items Enum: `"clips"` `"refers"` `"sources"` `"simulcasts"` `"mentions"` `"description"` `"live_info"` `"channel_stats"` `"songs"`
  Example: `include=live_info,clips`
  Comma separated string of extra info for video. Should be a string instead of an array.

- `org`
  string
  Example: `org=Hololive`
  Filter by clips that feature the org's talent or videos posted by the org's talent

- `mentioned_channel_id`
  string
  Filter by mentioned channel id, excludes itself. Generally used to find collabs/clips that include the requested channel

- `sort`
  string
  Default: `"available_at"`
  Example: `sort=start_scheduled`
  Sort by any returned video field

- `order`
  string
  Default: `"desc"`
  Enum: `"asc"` `"desc"`
  Order by ascending or descending

- `limit`
  integer `<= 50`
  Default: `25`
  Results limit

- `offset`
  integer
  Default: `0`
  Offset results

- `paginated`
  string
  Default: `"<empty>"`
  If paginated is set to any non-empty value, return an object with total, otherwise returns an array.

- `max_upcoming_hours`
  number
  Example: `max_upcoming_hours=24`
  Number of maximum hours upcoming to get upcoming videos by (for rejecting waiting rooms that are two years out)

- `id`
  string
  A single Youtube Video ID. If Specified, only this video can be returned (may be filtered out by other conditions though)

Query Videos

Pretty much everything you need. This is the most 'vanilla' variant with almost no preset values, and `/channels/{channelId}/{type}` and `/live` endpoints both use the same query structure but provision default values differently for some of the query params.

Not as powerful at searching arbitrary text as the Search API (currently not documented/available).

AUTHORIZATIONS: > *ApiKeyAuth*

QUERY PARAMETERS

channel_id
string
Example: `channel_id=UCl_gCybOJRIgOXw6Qb4qJzQ`
Filter by video uploader channel id

status
string
Enum: `"new"` `"upcoming"` `"live"` `"past"` `"missing"`
Example: `status=past`
Filter by video status

lang
string
Default: `"all"`
Example: `lang=en,ja`
A comma separated list of language codes to filter channels/clips, official streams do not follow this parameter

type
string
Enum: `"stream"` `"clip"`
Filter by type of video

topic
string
Example: `topic=singing`
Filter by video topic id

include
Array of strings
Items Enum: `"clips"` `"refers"` `"sources"` `"simulcasts"` `"mentions"` `"description"` `"live_info"` `"channel_stats"` `"songs"`
Example: `include=live_info,clips`
Comma separated string of extra info for video. Should be a string instead of an array.

org
string
Example: `org=Hololive`
Filter by clips that feature the org's talent or videos posted by the org's talent

mentioned_channel_id
string
Filter by mentioned channel id, excludes itself. Generally used to find collabs/clips that include the requested channel

sort
string
Default: `"available_at"`
Example: `sort=start_scheduled`
Sort by any returned video field

order
string
Default: `"desc"`
Enum: `"asc"` `"desc"`
Order by ascending or descending

limit
integer `<= 50`
Default: `25`
Results limit

offset
integer
Default: `0`
Offset results

paginated
string
Default: `"<empty>"`
If paginated is set to any non-empty value, return an object with total, otherwise returns an array.

max_upcoming_hours
number
Example: `max_upcoming_hours=24`
Number of maximum hours upcoming to get upcoming videos by (for rejecting waiting rooms that are two years out)

id
string
A single Youtube Video ID. If Specified, only this video can be returned (may be filtered out by other conditions though)

from
string
ISO8601 Date String for minimum `available_at`. (`available_at` is the most accurate timestamp of when a video has gone live or became viewable - it is the first non null value of the `start_actual`, `start_scheduled` or `published_at` fields)

to
string
ISO8601 Date String for maximum `available_at`

Query Videos Related to Channel

A simplified endpoint for access channel specific data. If you want more customization, the same result can be obtained by calling the `/videos` endpoint.

AUTHORIZATIONS: > *ApiKeyAuth*

PATH PARAMETERS

- `channelId` required
  string
  ID of the Youtube Channel that is being queried
- `type` required
  string
  Enum: `"clips"` `"videos"` `"collabs"`
  The type of video resource to fetch. Clips finds clip videos of a `vtuber` channel, Video finds the `channelId` channel's uploads, and collabs finds videos uploaded by other channels that mention this `channelId`

QUERY PARAMETERS

- `lang`
  string
  Default: `"all"`
  Example: `lang=en,ja`
  A comma separated list of language codes to filter channels/clips, official streams do not follow this parameter
- `include`
  Array of strings
  Items Enum: `"clips"` `"refers"` `"sources"` `"simulcasts"` `"mentions"` `"description"` `"live_info"` `"channel_stats"` `"songs"`
  Example: `include=live_info,clips`
  Comma separated string of extra info for video. Should be a string instead of an array.
- `limit`
  integer `<= 50`
  Default: `25`
  Results limit
- `offset`
  integer
  Default: `0`
  Offset results
- `paginated`
  string
  Default: `"<empty>"`
  If paginated is set to any non-empty value, return an object with total, otherwise returns an array.

Responses

> **200** Success

GET `/channels/{channelId}/{type}`

Response samples

200

Content type
application/json

Example

Copy Expand all Collapse all

```
{
    "total": 0,
  - "items": [
      + { … }
    ]
}
```

Quickly Access Live / Upcoming for a set of Channels

This endpoint is similar to the /live endpoint and usually replies much faster. It is more friendly in general. The cost to execute a lookup is significantly cheaper. It's unfortunately less customizable as a result.

We recommends using this if you have a fixed set of channel IDs to look up status for.

AUTHORIZATIONS: > *ApiKeyAuth*

QUERY PARAMETERS

channels
string
comma separated Youtube Channel IDs

Responses

> **200** OK

GET /users/live

Response samples

200

Content type
application/json

Copy Expand all Collapse all

```
[
 - {
      "id": "string",
      "title": "string",
      "type": "stream",
      "topic_id": "minecraft",
      "published_at": "2019-08-24T14:15:22Z",
      "available_at": "2019-08-24T14:15:22Z",
      "duration": 0,
      "status": "new",
      "start_scheduled": "2019-08-24T14:15:22Z",
      "start_actual": "2019-08-24T14:15:22Z",
      "end_actual": "2019-08-24T14:15:22Z",
      "live_viewers": 0,
      "description": "string",
      "songcount": 0,
      "channel_id": "string"
   }
]
```

Get a single Video's metadata

Retrieves a video object.

Also retrieves Comments if query parameter `c` is set.

Also retrieves Recommendations if query parameter `lang` is set

AUTHORIZATIONS: > *ApiKeyAuth*

PATH PARAMETERS

videoId
required
string
ID of a Youtube Video

QUERY PARAMETERS

lang
string
Default: `"all"`
Example: `lang=en,ja`
A comma separated list of language codes to filter channels/clips, official streams do not follow this parameter

c
string
Enum: `"1"` `"0"`
Example: `c=1`
if `1` then will reply with timestamp comments for this video

List Channels

AUTHORIZATIONS: > *ApiKeyAuth*

QUERY PARAMETERS

type
string
Enum: `"subber"` `"vtuber"`
Type of Channel, whether it's a vtuber or a subber. Leave unset to query all.

offset
integer
Default: `0`
Offset results

limit
integer `<= 50`
Default: `25`
Results limit

org
string
Example: `org=Hololive`
If set, filter for Vtuber belonging to a specific org

lang
string
Example: `lang=en,ja,zh`
Comma separated list of languages. Language is a property of Channel, so only Channels satisfying the language will be returned. Leave empty to search for Vtubers and/or all clippers.

sort
string
Column to sort on, leave default to use 'org' as sort. Any first level property of channel should work here.

order
string
Enum: `"asc"` `"desc"`
ASC or DESC order, default asc.

       "description": "string"
   }
]
```

post-search-videoSearch

Flexible endpoint to search for videos fufilling multiple conditions. Descriptions with "any" implies an OR condition, and "all" implies a AND condition.

Searching for topics and clips is not supported, because clips do not contain topic_ids

AUTHORIZATIONS: > *ApiKeyAuth*

REQUEST BODY SCHEMA: application/json

- **sort** required
  string non-empty
  Default: `"newest"`
  Enum: `"oldest"` `"newest"`
- **lang**
  Array of strings
  If set, will filter clips to only show clips with these langs + all vtuber streams (provided `target` is not set to filter out streams)
- **target**
  Array of strings
  Items Enum: `"clip"` `"stream"`
  Target types of videos
- **conditions** >
  Array of objects
  Match all the following conditions
- **topic**
  Array of strings
  Return videos that match one of the provided topics
- **vch**
  Array of strings
  Videos with all of the specified channel ids. If two or more channel IDs are specified, will only return their collabs, or if one channel is a clipper, it will only show clips of the other vtubers made by this clipper.
- **org**
  Array of strings
  Videos of channels in any of the specified orgs, or clips that involve a channel in the specified org.
- **paginated**
  boolean
  If set at all, responds with total and items wrapping the array of objects
- **offset** required
  number
- **limit** required
  number
